DESIGNED FOR THE CLASSROOM  
WITH A 1 HOUR ASSEMBLY TIME!

FK-SPA-SP015

# Thing a MA Jig Flying Model Rocket

Thank you for your purchase of this Skill Level 1 model rocket kit by FlisKits. Careful attention to detail and following the instructions will result in a fine addition to your model rocket fleet.

The **Thing-a-ma-Jig** represents a leap in model rocketry design with the classroom in mind. Designed to be assembled in about an hour with adult supervision, the **Thing-a-ma-Jig** is the most exciting "First Rocket" ever developed!

The **Thing-a-ma-Jig** features **Jig/Tech™** technology which allows for very simple, quick and fool-proof assembly of your balsa fins. The laser cut balsa wood fins feature locking tabs that allow you to assemble the balsa fin unit with white

Glue in under 5 minutes. The assembly assures perfectly straight fins every time and the locking tabs keep the fin unit together until the glue has dried. It is then a simple matter to slide this fin unit into place on the rocket and secure with glue.

Be sure to visit the **FlisKits** web site for hints and tips on this rocket for builders and teachers alike! Find out more about our exciting line of model rocket kits for educators and youth group leaders at <http://fliskits.com/> (Click on Educators)
